

Customer focused, transparent Supply Chain Solutions.

By Marwaan Abdul - CEO Nexlog Supply Chain Solutions

While the average logistics company sells you a "one size fits all" solution, Nexlog offers our clients tailor made solutions that caters to all their needs.

N Nexlog is a third party logistics (3PL) company offering complete freight management solutions.

We pride ourselves in our adaptability to industry developments as well as client requirements. Our client interaction starts with an approach that the customer is comfortable with. As we gain a deeper understanding of the customer's needs, an incremental approach to optimisation is employed. Optimisation is done incrementally in order to reduce risk and limit, or even avoid disruption of your supply chain. The result is measured not only by price, efficiency and innovation, but more importantly customer satisfaction.

In order to satisfy our client's specific needs and not limit ourselves to a "standard practice" approach, we have assembled a team of experts that have a thorough understanding of the value chain. New clients are assessed by the entire team and a plan is designed to deliver a customer

centric experience that puts your business needs at the forefront.

Our solution capability spans land, air and sea transport in forwarding and customs, as well as transaction structuring, so as to optimise your entire supply chain service, not just the marginal costs on single aspects of your cargo movements.

Being what you need us to be is our greatest asset. Our company structure and flexibility allows us to deliver the service you need. We constantly strive to better align our service delivery with your business strategy and operations as it develops over time.

We advise on improving lead time, choosing optimal routing, optimal shipping and trading terms, offshore management and financing structures. From feasibility studies, facility design or resolving customs disputes, we have the capability internally and in our partnership networks to be what you need us to be.

We are also highly responsive to change and employ best in class staff members who have extensive experience in Imports/Exports/Courier/Air/Reefer/Customs, dependent on your specific needs. The supply chain industry is riddled with unforeseen challenges. Our holistic skills set equips us to overcome these challenges efficiently.

USP'S OF NEXLOG

• ADAPTABILITY

Our ability to embrace and adapt to change is one of our biggest assets and has placed us at the forefront of our industry

• IT STRUCTURE

A strong focus on IT within the logistics industry sets us apart from our competitors

• PERSONALISED SERVICE

The size of our business allows us to provide an intimate, customer centric service

• CSR

Nexlog is a level 1 BBBEE certified company and is fully committed to the empowerment of previously disadvantaged communities

• TRANSPARENCY

What you see is what you get. Our transparent methods eliminates confusion and promotes efficiency

• CUSTOMIZATION

Each client is thoroughly assessed to formulate a tailor made solution that caters to their unique needs
